GlassRenu Announces Professional Grade System

Breakthrough System is Industry's First to Remove Damage from Flat, Curved and Auto Glass Without Distortion

PACHECO, Calif., Nov. 2, 2009 -- GlassRenu®, manufacturers of the industry's premier solution for removing scratches and acid damage of any size and depth from all types of glass, today announced a breakthrough in glass repair, the GlassRenu Professional Grade Glass Repair System. Leveraging GlassRenu's signature scratch-removal process, the breakthrough Professional Grade System removes damage without distortion or trace marks on auto and residential glass, a GlassRenu and industry first.

"When we launched the Contractor Grade System in 2007, the industry's response to our quick, clean process and no-distortion results was overwhelmingly positive. Yet, speaking with users, one question kept coming up over and over: 'When will you have a product that works on curved and auto glass?'," commented GlassRenu COO Cody Thomas. "In developing the new Professional Grade System we kept our users' question in mind, delivering a tool that allows glass repair technicians to eliminate damage on both flat and curved glass with the same great results as our Contractor Grade System."

The right tool for the right job, the Professional Grade System was designed to tackle small to medium jobs on both flat and curved glass. Its compact and lightweight design makes the Professional Grade System nimble and easy-to-use in almost any situation. Ensuring the ultimate level of control, a new custom-engineered handle makes the system comfortable to grasp and easy to maneuver. Innovative flexible backing pads allow GlassRenu's patented RenuDisks® to conform to the shape of whatever glass is being repaired. Fast and ideal for detail work, the Professional Grade System allows users to easily restore glass right up to the edge of the frame.

The Professional Grade System is sold as a field-ready kit designed to take a beating. Its ultra-portable ballistic nylon ruggedized case features a durable foam interior to secure and protect tools, press-and-pull latches to hold fast and a Vortex™ valve to automatically adjust air pressure without letting in water. The Professional Grade System includes everything you need to get started in the box:

- Compact lightweight hand-held grinder
- Custom-made backing disks
- A high-quality polishing felt pad
- 80 RenuDisks
- Rasp File
- Non-Contact Laser Temperature Gun
- Polishing Compound
- Finishing Solution
- Dust Mask
- Manual/Instructions

Developed in the field by a veteran glass technician, GlassRenu technology quickly removes glass damage without visible distortion. Up and running in under two minutes, GlassRenu systems use dry, not wet, technology to remove even the most severe scratches, acid damage and hard-water stains from all types of glass. The easy-to-learn three-step process relieves users from having to switch between numerous tools and utilizes GlassRenu's patented RenuDisk technology, so users can restore up to 15 square-feet of glass per hour.

Part of the only family of glass repair solutions to come with a 30-day money-back product performance guarantee, the Professional Grade Glass Renewal System is available for purchase as a field-ready kit featuring all tools and enough materials to repair approximately 200 square-feet of glass. To order, or for more information about the system, including a video demo, visit www.glassrenu.com.
