### **GlassRenu Announces Next Generation RenuDisk**

*Breakthrough Abrasive Technology Improves Industries Premier Solution to Remove Damage from Glass Without Distortion*

**PACHECO, Calif., Oct. 20, 2010** -- GlassRenu®, manufacturers of the industry's premier solution for removing scratches and acid damage of any size and depth from all types of glass, today announced a breakthrough in glass repair technology, Conditioning Disk Technology, CDT. Following years of research and development, GlassRenu has created a new abrasive that, when used with the GlassRenu Scratch Removal process, allows users to not only reduce the time of repair, but also reduce their material costs for repairs up to 30%.

"At GlassRenu we are always looking for ways to improve our products and the results they offer our customers. Recognizing that our system was already removing damage everyone else said was impossible to remove, we turned our focus to speeding up the process and reducing the cost per repair." Commented GlassRenu COO Cody Thomas. "In developing this new technology we turned to our R&D Technicians as well as some of our bigger customers to work together to develop a better RenuDisk. Working with Chris Hernandez of Scratch Doctors over the past year, we have been able to develop the first abrasive disk that actually performs better the more it is used, this disk is the new Conditioning Disk Technology (CDT) RenuDisk."

Available to current GlassRenu users, the new CDT RenuDisk will reduce the time needed to prep the glass for polish by 20% to 30% and reduce polishing time by 30% to 40%. Additionally by allowing users to continue to use disks that otherwise would have been discarded after 15 square feet of use, CDT Disks should be able to provide excellent repair results for up to 1000 square feet of glass. The cost savings of being able to reuse disks from repair-to-repair will allow users to save upwards of 30% of the cost per repair.

The GlassRenu Contractor Grade Scratch Removal System is available for purchase as a field-ready kit with all tools and enough materials to repair approximately 500 square feet of glass. To order, or for more information about the system and GlassRenu's new CDT RenuDisks please visit [www.glassrenu.com](http://www.glassrenu.com).

## **About GlassRenu**

Founded in 2006, GlassRenu has become the glass restoration and repair industry's leader in providing glass scratch and graffiti removal solutions that deliver clarity, without visible distortion. The company offers a full line of glass repair products that are available in North America, Europe and Australia. Privately held, GlassRenu is headquartered in Pacheco, Calif.
